Maintenance and developing of Drezzy website.
Maintenance and developing of parts of ShoppyDoo website.
Technologies: C#, IIS, ASP.net MVC

Other information

XP Programming background

I strongly believe in TDD as software methodology and during my time in 7Pixel SRL I've used XP Programming as development methodology.
I strongly believe in Team Work and in Agile manifesto since during my career I had the freedom, together with the team, to develop and explore the methodology that best fitted our job.
I like to think the software developer as an artisan working on an industrial scale because through the passion of his work and knowledge can influence thousands of people at the same time.
