Summary

I'm a professional with a variegated background, a strong will for learning and some valuable experiences.
I consider myself a person with a good mental flexibility that allows to read different situations and solve different kind of problems.
Experience suggested me to think about myself as an ace of spaces developer with a slow but steady and robust learning pace.
Agile manifesto supporter, Devops believer, looking for building something to care for and to learn in the process.

Values buzzwords

Agile Software Development, TDD, Maintainability, eXtreme Programming (XP), Testing, Frustration driven development, Devops, Code commitment, Clean Code, Iterative approach, Continuous Deployment, "if it doesn't work, change it".
